

NOMAN MAJEED

Senior Software Engineer | Python · FastAPI · Django · DRF · AI/LLM | 6+ Years
nomanmajeed986@gmail.com · +92 334 953 8387 · linkedin.com/in/nomanmajeed986 · Islamabad, Pakistan

Certified Senior Software Engineer with 6+ years of experience building reliable, high-performance backend systems for companies in AI, fintech, healthcare, SaaS, and e-commerce. Strong hands-on expertise in Python, FastAPI, and Django, with solid experience in cloud deployments (AWS, GCP), microservices architecture, and async processing using Celery and Redis. Comfortable working with PostgreSQL, ClickHouse, and large-scale data pipelines. Have built and integrated third-party systems including VoIP platforms, eCommerce tracking, and AI-powered chat solutions. Experienced with Docker, CI/CD pipelines, and GitHub Actions. Have delivered solutions used by 2M+ users, cutting query times by 40%, improving response speeds by 30%, and reducing deployment time by 85%. Also enjoy mentoring junior engineers and contributing to architecture decisions. Currently deepening expertise in Generative AI, LLMs, LangChain, LangGraph, and agentic AI to build smarter, AI-native backend systems.

TECHNICAL SKILLS

Languages	Python, JavaScript, TypeScript, SQL
Frameworks	FastAPI, Django / DRF, Flask, Next.js, React.js
Databases	PostgreSQL, ClickHouse, MySQL, MongoDB, Supabase, MS SQL Server
Infra/DevOps	AWS (EC2, S3), GCP (Cloud Functions, Cloud Run, Pub/Sub), Docker, GitHub Actions, GitLab CI, BuddyWorks, Sentry
Async/Cache	Celery, Redis, RabbitMQ, Flower, Django Channels, WebSockets, Pusher
AI / LLM	LangChain, LangGraph, CrewAI, MCP, Vellum, OpenAI API, DeepSeek, Claude
Data/Testing	Pydantic, Pandas, NumPy · Pytest, Cypress, JEST

PROFESSIONAL EXPERIENCE

Senior Software Engineer — Tally.no (Silfer Consulting AS) Stack: <i>TypeScript, Next.js, Supabase, PostgreSQL (RLS), Stripe, Signicat, Criipto, GitHub Actions, Vercel</i> - Built full-stack finance CRM from scratch with CTO; MVP live in 5 months with real users. Core modules: companies, deals pipeline (lead→won→onboarding), contacts with many-to-many linking, and saved views with custom filters and columns. - Implemented 50+ table RLS policies, multi-tenant org system with RBAC, role-based invitations, Google/Microsoft SSO, MFA (TOTP/recovery codes), KYC/KYB via Signicat, and BRREG Norwegian company registry lookup. - Built configurable workflow engine with templates, triggers (manual, contract signature, service assignment), cadence scheduling, per-client overrides, and auto-assignment rules. - Delivered offer composer (services, bundles, pricing), contract lifecycle with Criipto digital signing, Stripe subscription billing with affiliate/referral commission, time tracking with Norwegian overtime/flex rules, and Kanban/list/calendar task views with recurring tasks, checklists, and attachments. - Developed work management module with task-to-deal/company linking, comments, and admin approval flows; built dashboard analytics, deal/contact visit tracking, lead generation metrics, and notifications via email (Resend) and SMS (Infobip). - Shipped CI/CD pipeline with GitHub Actions for automated deployments with migration handling and Slack integration for real-time deployment and PR notifications.	<i>May 2025 – Present · Remote</i>
Senior Software Engineer — Usermaven Stack: <i>Python, FastAPI, PostgreSQL, ClickHouse, Redis, Celery, Flower, Stripe, Auth0, Docker, BuddyWorks, Vellum</i> - Optimized FastAPI service layer reducing API latency from ~620ms to <150ms; resolved N+1 ORM patterns cutting DB round trips 75%; architected ClickHouse QueryBuilder reducing OLAP complexity 40% and response times 30%. - Designed Maven Query Engine with Redis caching — 80% less boilerplate per analytics view; delivered 100+ Pydantic-validated REST endpoints; built Maven AI conversational assistant on Vellum LLM with streaming support. - Built multi-touch attribution pipeline (Google, LinkedIn, Facebook, Bing Ads) via ClickHouse materialized views; reduced pipeline failures 95% via robust error handling; established Pytest/Cypress/JEST testing infrastructure. - Developed WordPress (WooCommerce plugin), Shopify (custom app), and Chrome extension integrations; built interactive analytics dashboard with scheduled reports via email and Slack; applied Strategy, Builder, Factory patterns for async report scheduling.	<i>Jun 2023 – May 2025 · Hybrid</i>
Senior Software Engineer — Datics.ai Peerlogic — Dental Conversational AI (Jan 2023 – Jul 2023) Stack: <i>Python, DRF, GCP (Cloud Functions, Pub/Sub, Cloud Run), PostgreSQL, Redis, Celery, Django Channels, GitHub Actions</i> - Integrated 6 VoIP providers (GoTo, Bandwidth, Netsapiens, RingCentral, NexHealth, Twilio) with normalized DRF webhook receivers and Redis idempotent deduplication — eliminated 80% of redundant CDR processing. - Designed 3-tier AI pipeline (Django Signals → Celery NLP workers → GCP Pub/Sub + Cloud Functions) cutting NLP queue wait time 65% and pipeline bottlenecks 80%; built internal Python SDK (110+ endpoints) reducing consumer integration time 60%.	<i>Nov 2021 – Jul 2023 · Remote</i>

- Replaced 5s polling with Django Channels WebSocket consumers — 90% server load reduction; implemented GIN full-text indexing cutting transcript search latency 55%; established GitHub Actions + Cloud Run CI/CD improving deployment efficiency 85%.

Secure Tax Office & Tax Collector (Nov 2021 – Dec 2022)

Stack: Python, DRF, PostgreSQL, Redis, Celery, RabbitMQ, AWS (EC2, S3), Docker, Sentry

- Architected multi-parish tax roll ingestion (Strategy/Reader patterns + Pandas vectorization) — 60% faster; built Disbursement & Distribution engine with PostgreSQL materialized view cutting report generation from 6s to <1s; optimized 8 report types from 100+ DB queries to <10 per request (70% API improvement).
- Delivered Tax Sale lifecycle, Deduction Management, Ownership Split pipeline (15,000+ parcels/cycle), payment reversals with prior-year validation, ACH/credit card payment features via RSA-signed Celery tasks with full audit trails, and Tax Collector ↔ STO integration across 50+ parishes.

Software Engineer — TenX.ai

Jun 2021 – Nov 2021 · Lahore, PK

Stack: Python, Django, Angular, MySQL, Vertica DB

- Developed modules for Tasdeeq financial analytics platform — Financial Reporting, Budget Management, Credit Analytics, and Forecast Analytics dashboards; built Vertica DB data pipeline integrations and Angular UI components.

Software Engineer — International Medical Corps

May 2020 – Jun 2021 · Islamabad, PK

Stack: Python, Django, DRF, React.js, MS SQL Server, Redis, Celery, Django Channels

- Built four applications: Country Analytics app, Treasury Management System, Warehouse Portal, and CBFMR (Community Based Feedback & Response Mechanism) — RESTful APIs, analytics dashboards, and management features.
- Designed React.js frontends integrated with Django/DRF backends; implemented real-time features via Django Channels and WebSockets; handled async background jobs with Celery and Redis.

FREELANCE & CONTRACT PROJECTS

Senior Software Engineer (Contract) — DashAnalytix

Feb 2025 – Mar 2026 · Remote

Stack: Python, Django, DRF, PostgreSQL, Redis, Celery, Docker, AWS EC2, OpenAI, DeepSeek, Agno, Statsmodels, Pusher

- Built Working Capital module (AP/AR tracking, liquidity projections), Scenario Builder for financial modeling, and domain-based dashboard sharing; designed multi-tenant architecture with strict per-org data isolation and Xero/QuickBooks OAuth 2.0 integration — 70% less manual data entry.
- Built AI forecasting commentary layer (OpenAI/DeepSeek via Agno) with usage-based billing; implemented BuddyWorks CI/CD with multi-stage Docker builds, Pytest gates, Doppler secrets management, and zero-downtime AWS EC2 deployments — 85% faster deployment cycles.

Senior Software Engineer (Contract) — Pigeonly

Nov 2024 – Feb 2025 · Remote

Stack: Python, FastAPI, Flask, PostgreSQL, Redis, Celery, RabbitMQ, Docker, GCP (GKE), GitLab CI

- Maintained 3 production microservices (Corrections, Attorney Mail, Physical Mail) on GKE; migrated Flask to FastAPI with async refactoring — 50% response time reduction, 60% less boilerplate.
- Extended auth with SSO + JWT-based feature flagging for granular access control; enforced GitLab CI with 95% Pytest coverage gate and zero-downtime rolling deployments on GKE.

PERSONAL PROJECTS

Devflow	Stack Overflow-style Q&A community platform — Next.js, MongoDB
Finlytics	Personal finance analytics app — MERN Stack
Lead CRM	Customer relationship management system — Django, Tailwind CSS, SQLite3
WooStore	Full-featured online shopping platform — Django, CSS3, SQLite3
Doomflix	Video streaming platform replica — React, Styled Components, Firebase

EDUCATION

BS Software Engineering — COMSATS University, Islamabad (GPA: 3.48 / 4.0)

Feb 2016 – Jan 2020

CERTIFICATIONS & TRAINING

▪ Ultimate Next.js Course — JSMastery	Dec 2024
▪ Deep Learning for AI — Dice Analytics	Apr 2019
▪ Python and Data Science — Dice Analytics	Aug 2018
▪ Web Development — Inductin	Aug 2017
▪ Merit Scholarship — 2nd Position, CS Dept, COMSATS	2016–2020
